**I hereby declare that:**

Each inventor's residence, mailing address, and citizenship are as stated below next to their name.

I believe the inventor(s) named below to be the original and first inventor(s) of the subject matter which is claimed and for which a patent is sought on the invention entitled:

A new method of locking intramedullary nails to use threaded guidewires. The threaded guidewire is placed in between screws of an intramedullary nail. Whenever a more proximal screw is placed with the guidewire, the more distal screw is locked to the nail. In addition, movement or play of the more proximal screw is minimized. The new design locks the screw in place to eliminate this play and result in a more stable form of fixation.
